

ULTIMATE HOT WATER EFFICIENCY

Working smarter to save
energy and the environment.

15% MORE EFFICIENT*

Developed to reduce wasted energy this unit pre-heats the water using heat from the gas exhaust, meaning you'll use less energy.

*Thermann model 26NG50C when compared to 26NG50, based on comparative energy consumption when tested to AS 4552. **AS 4552 limits the rating shown on the energy label to 6.0 Stars. Where the calculated rating exceeds 6.0 Stars it is designated as an "equivalent" rating.

7.3 star** equivalent rating (on 50°C model)

Uses less gas, meaning greater energy cost savings

12 year heat exchanger warranty

Available in 50°C and 60°C models

Low pressure operation - 115kPa

Universal controller available (optional)
